

Dear Client,

I am excited to share that Sanders Laboratories has joined the Eurofins family, a leading global laboratory testing organization. The agreement between Eurofins and Sanders Laboratories took place February 1st, 2026, where Eurofins has acquired the assets of the business. As of this date, Sanders Laboratories operating in Nokomis and Ft. Myers have divested their interests to Eurofins Drinking Water and Wastewater Southeast LLC, a subsidiary of Eurofins Scientific.

While ownership has changed, our local presence has not. You will continue to work the same hometown team you know and trust as there are no changes in staff. Locations, service, and support remain the same. You will continue to enjoy Sanders distinctive personal attention and timely results, while enjoying increased testing capabilities offered by extensive Eurofins resources.

Eurofins has much to offer our clients and employees. Eurofins is a public company with over 61,000 employees, operating in 61 countries and within several testing sectors. Eurofins is the leading provider of Environmental Testing Services globally. Please refer to www.eurofinsus.com for further information.

We will be in contact with you over the next several weeks to update you regarding any coming changes such as banking information, company name, and tax ID that will be necessary to ensure a seamless transition of your account.

We look forward to a bright future as we move ahead within a larger organization that already operates as the US and Global market leader in the Environmental Testing sector, as well as market leader in several other important scientific testing arenas.

If you have any questions, please reach out. We truly value our relationship with you and look forward to working with you as we move forward.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Henry Mason", with a horizontal line extending to the right.

Henry Mason
